TECHNICAL PROJECTS

Temp(o) - Website | GitHub
Get todays temp around the world and some nice tunes while you're at it.
• Provides a clean and minimalist UX/UI for easy use.
• Uses React hooks to store state and persist with local storage.
• Fetches data from the OpenWeather API and displays music results based on data conditions.

Carrot Admin - Website | GitHub
Join the Carrot admin team and manage our tasty food stock.
• Uses React/Material UI for a clean and easy to use client side.
• Uses Firebase to perform all CRUD actions and manage user authentication.
• Demonstrates key features a developer might find themselves having to build when assisting a company.
• Designed with a mobile first mindset for use on all screen sizes.

Gobbler - GitHub
Celebrate by contributing to a sponsored charitable cause. Interact and discover what Thanksgiving is all about.
• Designed a React client side for visual interaction and exploration.
• Incorporated Redux + Thunk middleware to respond to and modify state change.
• Engineered a Rails API with SQLite to perform CRUD actions.

WORK HISTORY

Gesture (yourgesture.com) - Front End Web Developer Intern   **06/2020 - present**
An on-demand gift delivery service, using React and Firebase to supplement 5000+ users and 200+ monthly orders.
• Develop new user-facing features using React.js.
• Translate designs and wire frames into high-quality code usable on various web-capable devices and browsers.
• Debug and user test features/components.
• Brainstorm, psuedocode, and discuss company goals with the software engineering team on a regular basis.

Lincoln Financial Group - Case Manager   **2018**
• Conducted investigations to determine whether or not to accept liability and to what degree.
• Consistently used Excel Spreadsheet Software to manage, create and manipulate great deals of data.
• Provided excellent customer service, including helping customers with any troubleshooting issues.
